

FOC-01-A

SPECIFICATIONS

The fiber collimator with low backreflection, designed to collimate light exiting a fiber to a desired beam diameter. This collimator is designed to connect to the end of FC or SMA905 connector and contains an AR-coated spherical lens.

Connector	SMA905 or FC/PC			
AR coating transmission	>95%			
Fiber Core Diameter(μm)	50	100	200	400
Beam diameter at aperture (mm)	5- 7	5-7	5-7	6- 8
Beam divergence, full angle (mrad)	6-8	7-9	10-12	17-19

Note: The parameters are different for different types of lasers.
